Cookies Policy

By continuing to use our site, you accepted to receive cookies. A cookie is a small file of letters and numbers which we save on your browser or on the device from which you access this site. Some of these are vital to make the site work (particularly to ensure safe access to any secure areas of the site). Others enable us to analyze usage of our sites so that we can make improvements and ensure they are relevant and user-friendly.

We also save cookies which identify you so that we can tell you apart from other users and tailor the site to you when you return to it: for example, by greeting you by name and remembering your preferences, such as the language you speak or the country you are in.

You have consented to our using those identifying cookies, by clicking "Continue" on the banner that appeared when you first visited the site, or by navigating to another part of the site from that banner.

You can also block cookies by activating the setting on your browser that allows you to refuse the setting of all or some cookies. However, if you use your browser settings to block all cookies you may not be able to access all or parts of our site. It may be that your concerns regarding cookies relate to so-called ‘spyware’. Rather than switching off cookies in your browser you may find that anti-spyware software achieves the same objective by automatically deleting cookies considered to be invasive.
